Profile

B.Tech Computer Science and Engineering (Data Science) student at Ballari Institute of Technology and Management with an interest in software development, programming, and data science. Familiar with C, Python, and Java, with a strong interest in developing practical projects and improving technical skills.

Education

B.Tech – Computer Science and Engineering (Data Science)	2025 – 2029
Ballari Institute of Technology and Management (BITM)	CGPA: 7.49
Class XII / PUC	76%
Class X	84%

Technical Skills

Programming Languages: C, Python, Java

Core Skills: Problem Solving, Programming Fundamentals, Data Science Basics

Projects

calender display system

- Developed a beginner-friendly learning project to display calender using console features.
- Worked with c and basic data analysis and data learning concepts.

line detector robot System

- Developed a computer-vision based system to control computer actions using hand gestures.
- Explored Python, OpenCV, MediaPipe, NumPy and PyAutoGUI.

bank Management System in C

- Designed and assembled an autonomous line following robot using IR sensors and a microcontroller to enable accurate path tracking along pre-defined routes.
- programmed motion control algorithms to process real time sensor feedback,optimizing motor response for smooth navigation and precise trajectory adjustment. .

Academic Interests

Data Science, Artificial Intelligence, Software Development, Machine Learning, Problem Solving

Languages

English — Kannada — Hindi

Additional

- Active participation in academic projects and technical activities.
- Interested in developing practical software and data-science projects.
